Office Action Summary

Art Unit: 1761

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-43 and 60-65, drawn to a method of preparing and packaging two or more food items, classified in class 426, subclass 414.
 - II. Claim 44-59, drawn to a wrapped food, classified in class 426, subclass 106.

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The product as claimed in Group II can be made by a method other than that recited in Group I. for example, the product could be made without co-extrusion, without extruding in general and without being part of a continuous process. The product could be made by separately casting or molding the components in a batch operation and then taking the separately formed preforms placing them in a wrapper and wrapping the preforms in a batch or by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Mr. Weinstein at telephone number (703) 308-0650.
